## PROFESSIONAL SUMMARY

Frontend Engineer with 3+ years of experience building large-scale enterprise applications using Angular. Proven leadership in leading frontend teams, designing reusable component systems, and optimizing complex user interfaces. Adept in performance tuning, dynamic UIs, and cross-functional collaboration. Passionate about applying AI and automation to improve developer workflows.

---

## PROFESSIONAL EXPERIENCE

### Frontend Engineer | Apr 2025 – Present

FPT IS – E-hiring system

- Upgraded Angular version from v8 to v19.
- Developed a new core system with fully dynamic form, layout, and component rendering.
- Implemented role-based authorization and secure access logic.
- Boosted performance by optimizing rendering and lazy-loading large datasets.
- Maintain, operate, and support additional customer requests.
- Stack: Angular 19, RxJS, Jsonata, TailwindCSS, Ant Design, LESS, NestJS (micro services), MongoDB, GitLab, Docker, Monorepos with Nx.
- Team size: 10.

### Frontend Engineer | Jun 2024 – Apr 2025

FPT IS – HR Management System

- Led a frontend component team of 10 people in reviewing merge requests, task assignment, and architecture planning with SA or TA.
- Engaged with clients for requirement analysis and estimations.
- Refactored critical components, improving loading of 100k+ records.
- Contributed to build fast 1000+ screen system with reusable component architecture.
- Collaborated with 200+ cross-functional members.
- Stack: Angular 18, RxJs, LESS, TailwindCSS, REST API, API Gateway (BFF), Jsonata, Monorepos with Nx, MySQL, Docker, GitLab.
- Team size: 25. (Frontend only)

### Associate Frontend Developer | Jan 2022 – May 2024

DXC Technology – Insurance System

- Built in a insurance system about business, scale up to 1000 screens, with multiple flows and complexity business as the customer required.
- Using dynamic component, screens to make a new screen easier and faster.
- Contribution by built a directive and pipe to convert and format the currency.
- Main stack: Angular 8, MUI library, SASS, Lodash, REST API, Axios, Jira, Jenkins, Github.
- Team size: 24

## **Frontend Developer | Jan 2023 – Dec 2023**

Freelancer – Store Management System

- Developed a Store Management System: Led the creation of a dynamic, interactive platform for city-wide store management.
  - Built scalable, maintainable UI components using Vue 3 and its Composition API, ensuring a modular and efficient architecture for the entire application.
  - Utilized Mapbox and Google Maps APIs to implement interactive, real-time maps that allow users to visualize store data across different geographical locations.
  - Stack: Vue 3, Mapbox API, Google Maps API, Lodash, Bootstrap 5, and SCSS for styling. Employed REST API for server-client communication and version control with GitLab.
  - Team size: 3
- 

## **EDUCATION**

### **University of Greenwich | Aug 2018 – Jan 2022**

BSc in Software Engineering

- Second Class Honors (1st Division)
- 

## **TECHNICAL SKILLS**

- Languages & Frameworks: Angular 2+ (up to v19), React.js, Vue.js, TypeScript, JavaScript
  - UI/UX: HTML5, CSS3, SCSS, LESS, TailwindCSS, Bootstrap, MUI, Ant Design.
  - Data & Backend: REST API, JSON, NestJS, MongoDB, PostgreSQL, MySQL.
  - Tools & Libraries: RxJS, Lodash, Jest, Husky, GitLab, GitHub, Jira, Figma, Mapbox, Google Maps API.
  - Others: Agile/Scrum, Unit Testing, AI-assisted development, CI/CD.
- 

## **SOFT SKILLS**

- Team Leadership: Experienced in mentoring junior developers, assigning tasks, and conducting code reviews.
  - Communication: Comfortable presenting technical ideas to clients and stakeholders.
  - Problem-Solving: Skilled in breaking down complex problems and delivering practical solutions.
  - Adaptability: Able to quickly learn and apply new tools, frameworks, and technologies.
  - Collaboration: Strong in cross-functional teamwork, including designers, QA, and backend engineers.
  - Time Management: Experienced in handling multiple projects and meeting tight deadlines.
- 

## **INTERESTS**

- Researching AI models and workflows.
  - Learning new technologies and solutions.
  - Watching advanced frontend tech breakdowns on YouTube.
  - Exploring productivity tools and MCP (Multi-Context Programming).
-
